PROFESSIONAL SUMMARY

Software Developer with hands-on experience building full-stack and mobile applications leveraging C#, Kotlin, Java, and modern architectural patterns. Proven ability to design RESTful APIs, co-develop in Agile teams, and deliver production-style projects with an emphasis on scalability and maintainability. Passionate about building clean, user-focused software and improving through collaboration, learning through mentorship, test-driven development and code review.

SKILLS

C#, Kotlin, Java, Python, C++, SQL	.NET, Jetpack Compose, Android SDK
Git/GitHub, REST APIs, Relational Databases, Unity, Visual Studio, Android Studio	Object-Oriented Programming, Data Structures & Algorithms, RESTful Architecture, Agile/Scrum, Test-Driven Development

PROJECT LIST

- | | |
|--|------------------------------|
| PLANTPAL | October 2025 - February 2026 |
| <ul style="list-style-type: none">Designed and synchronized 2 RESTful API and relational databases for plant health tracking and user achievement.Architected backend system in collaboration with 2 developers in Agile environment.Synchronized 2 reminder scheduling systems for watering, fertilization, and sunlight monitoring and custom reminders.Mentored co-developer in proper version control procedure and Jira board consistency. | |
| SUCRA | October 2025 - January 2026 |
| <ul style="list-style-type: none">Built from-the-ground-up Kotlin Android application for Type 1 diabetes management.Developed structured, 7-days-a-week logging system for blood glucose, insulin dosage, and meals.Engineered dynamic trend visualizations with three distinct graph models.Implemented intuitive, clean, and concise UI in Jetpack Compose principles. | |
| VOICEJOURNAL | May 2025 - June 2025 |
| <ul style="list-style-type: none">Developed 1 full Android journaling app using Kotlin and Jetpack Compose.Integrated speech-to-text transcription for up to 160+ voice entries per day.Authored keyword tagging and 7-days-a-week calendar-based entry navigation.Integrated Google Drive API for optional cloud backups (up to 24 months). | |
| 3D ASCII ENGINE | March 2024 - October 2024 |
| <ul style="list-style-type: none">Engineered 3D ray-casting engine in C# rendering real-time ASCII graphics in Windows console.Optimized game loop to maintain stable 60 FPS performance.Established collision detection, camera movement, and environmental rendering for smooth 60 frames a second gameplay. | |

EXPERIENCE

- | | |
|---|---------------------------|
| WEB DEVELOPER | June 2020 - November 2022 |
| SJ Tree Farm, St. Augustine, FL | |
| <ul style="list-style-type: none">Designed and created a responsive marketing website for a small business client, supporting visibility for approximately 50 daily customers from concept through deployment.Implemented modern UI design principles to improve usability, readability, and mobile accessibility. | |

EDUCATION

- | | |
|---|---------------|
| Bachelor of Science in Computer Science (B.S.) | February 2026 |
| Full Sail University, Winter Park, FL | |
| Pushed 16+ software applications, including 4 full-stack systems, using C#, Kotlin, Java, and relational databases, and coordinated multiple frontend-backend API contracts and mentored teammates on version control and workflow consistency. | |
